**DETAILED ACTION**

This application is a 371 of PCT/EP00/06091.

Claims 1-7 are pending.

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 3-7, drawn to a DNA encoding an orotate phosphoribosyl transferase, vector comprising said DNA, host cell comprising said DNA and a method of producing said transferase.

Group II, claim(s) 2, drawn to an orotate phosphoribosyl transferase encoded by the DNA of Group I.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-II appears to be that they all relate to an orotate phosphoribosyl transferase.

However, Rasmussen et al. (from PTO-892) teach a portion of an orotate phosphoribosyl transferase (see NCBI – Accession S47907)

Therefore, the technical feature linking the inventions of Groups I-II does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

The special technical feature of Group I is a DNA encoding an orotate phosphoribosyl transferase, vector comprising said DNA, host cell comprising said DNA and a method of producing said transferase.

The special technical feature of Group I is an orotate phosphoribosyl transferase encoded by the DNA of Group I.

Accordingly, Groups I-II are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
